EDUCATION

Carnegie Mellon University

Human Computer Interaction Institute, Master of Educational Technology and Applied Learning Sciences

Pittsburgh, PA

Dec. 2026

New York University

Bachelor of Arts - Mathematics

New York, NY

May. 2025

SKILLS

Product Design: Product Requirements, User Flows, Wireframing, Prototyping, User Testing, Interaction Design, Figma

Development: Python, JavaScript, HTML/CSS, Django, Ajax, REST APIs, Git/GitHub, SQL, JSON, p5.js

AI & Tools: Cursor, Claude, Google AI Studio, VS Code, OLI, Learnvia; Mandarin Chinese, English, Korean

PROFESSIONAL EXPERIENCE

Carnegie Mellon University

Design Lead & Product Developer

Pittsburgh, PA

Feb. 2026 - Present

- Designed an AI-powered calculus learning workflow grounded in mathematical reasoning and human-AI collaboration, guiding students from real-world problem creation to rubric-based feedback.
- Developed web-based LLM components to generate scenarios, simulate AI student responses, and provide adaptive feedback aligned with learning objectives.

China United Network Communications Group

Data Analysis Intern

Hunan, China

Jun. 2024 - Aug. 2024

- Analyzed telecom call, SMS, and roaming data to identify scam-related behavioral patterns and guide feature design.
- Developed behavioral features and baseline tree-based classification models to support scam-risk analysis, enabling clearer internal reporting and future model iteration.

Independent Consumer Brand

Founder & Product Developer

Hunan, China

Mar. 2021 - Dec. 2023

- Launched an independent consumer brand from concept to market, leading product strategy, design, production coordination, pricing, and go-to-market execution to achieve 20K+ unit sales.
- Converted customer demand and community feedback into product concepts and iterative improvements, while managing brand positioning, online sales channels, and launch operations to strengthen product-market fit.

PROJECTS

AI-Powered Accounting Learning Platform

Carnegie Mellon University Capstone Project with Yale School of Management

Pittsburgh, PA

Dec. 2025 - Aug. 2026

- Led product design for an AI-powered accounting platform, linking learner progress and assessment checkpoints to AI tutor interactions for more personalized feedback.
- Designed connected activities and assessment checkpoints that inform AI tutor responses, enabling contextualized feedback and personalized support.

ASL Master

Carnegie Mellon University course project

Pittsburgh, PA

Jan. 2026 - Present

- Designed and developed a webcam-based ASL fingerspelling tool using p5.js and MediaPipe for real-time hand tracking, with adaptive hints and progressive scaffolding; selected for AIED 2026 Interactive Events.
- Built and tested multi-level learning flows from guided letter practice to independent spelling tasks, improving gesture tolerance, visual feedback, and instructional flow.

Intelligent Scrolling: AI-Powered Content Navigation

Carnegie Mellon University AI Widgets Independent Study

Pittsburgh, PA

Aug. 2026 - Present

- Conducting literature review and contextual observations to understand how users locate, revisit, and compare information in long documents and AI conversations.
- Designing an intelligent scrolling interaction that connects semantic queries to direct navigation, content previews, and return-to-position support.

Tone-Aware Translation App

Independent Product Project

Pittsburgh, PA

Dec. 2025 - Present

- Designed and developed a tone-aware translation app that adapts translations by audience, context, and communication intent to support more natural cross-language communication.
- Built tone selection, translation comparison, and revision workflows while preparing the product for public release.
